40-49: 4 (28.6%) **90+: 0** (0.0%)

HOW WE ARE SEEING COVID-19 SPREAD

- In the days prior to individuals becoming sick or while experiencing symptoms, individuals reported attending gatherings where people are not social distancing and not wearing masks.
- We continue to see spread between positive cases and other people living in the household/living unit, including younger age groups that have not been vaccinated yet.
- We continue to see community spread, meaning individuals are unsure where they got the virus.
- There are a number of facility-wide COVID-19 public health investigations.
